DIV OF WATER RIGHTS
SACRAMENTO

A. **Water is Used Under:** Riparian claim ___ Pre-1914 claim ☒ Court Decree No.: ___ Other (explain): ___

B. **Year of First Use:** (Please provide if missing in the Division of Rights database (ewrims)) ___

C. **Rate of Diversion:** The rate of diversion of water for each month used and entered in the table below is shown in units of:
Gallons per minute (gpm) ___ Gallons per day (gpd) ___ Cubic feet per second (cfs) ___

Year	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec	Average Rate
2005													
2006													
2007													

D. **Quantity of Water Used:** The quantity of water used each month and entered in the table below is shown in units of:
Gallons ___ Million Gallons (MG) ___ Acre-feet (AF) ___

Year	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec	Total Annual
2005													
2006													
2007													

E. **Purpose of Use** – Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation ___ acres; Stockwatering ___; Domestic ___;
Other (specify) _____

Parcel Number(s) of Place of Use: _____

F. **Changes in Method of Diversion** – Describe any changes in your project since your previous statement was filed.
(New pump, enlarged diversion dam, location of diversion, etc.)

G. Please answer only those questions below which are applicable to your project.

1. Conservation of water

a. Are you now employing water conservation efforts? YES ☒ NO
Describe any water conservation efforts you have initiated: Signatory to CUWCC MOU Regarding Urban Water Conservation in California. Comprehensive Water Conservation program exceeding BMP requirements pursuant to NMWD Regulation 17.

b. If you are claiming credit for water conservation under section 1011 of the Water Code for your claimed pre-1914 appropriative right, please show the amount of water conserved:

Reduction in Diversions:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

Reduction in consumptive use:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

I have data to support the above surface water use reductions due to conservation efforts. YES _____ NO _____

2. Water quality and wastewater reclamation

a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree which unreasonably affects such water for other beneficial uses? YES _____ NO x _____

b. If you are claiming credit due to the substitution of reclaimed water, desalinated water or polluted water in lieu of a claimed pre-1914 appropriative right under section 1010 of the Water Code, please show amounts of reduced diversions and amounts of substitute water supply used:

Amount of reduced diversion:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

State the type of substitute water supply: _____

Amount of substitute water supply used:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

I have data to support the above surface water use reductions due to the use of a substitute water supply. YES _____ NO _____

3. Conjunctive use of surface water and groundwater

a. Are you now using groundwater in lieu of surface water? YES _____ NO x _____

b. If you are claiming credit due to the substitution of groundwater for a claimed pre-1914 appropriative right under section 1011.5 of the Water Code, please show the amounts of groundwater used:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

I have data to support the above surface water use reductions due to the use of groundwater. YES _____ NO _____

I understand that it may be necessary to document the water savings claimed in "F" above if credit under Water Code sections 1010 and 1011 is sought in the future.

I declare that the information in this report is true to the best of my knowledge and belief.

CONTINUATION

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

**NORTH MARIN WATER DISTRICT
REGULATION 17**

**WATER CONSERVATION
(Point Reyes and Paradise Ranch Estates Service Area)**

a. Purpose

The purpose of this regulation is to assure that water resources available to the District are put to reasonable beneficial use, that the in-stream values of Lagunitas Creek are preserved to the maximum possible extent and that the benefits of the District's water service extend to the largest number of persons.

b. Waste of Water Prohibited

Customers shall not permit any water furnished by the District to run to waste in any gutter or otherwise. Any customer who fails to repair a significant leak or otherwise eliminate waste of water within twenty days after becoming aware of it or receiving written notice from the District shall pay a penalty charge equal to ten times the commodity charge for the amount of water estimated by the District to have been wasted or \$50 whichever is greater.

c. Use of Water Saving Devices

Each customer of the District is urged to install devices to reduce the quantity of water to flush toilets and to reduce the flow rates of showers and faucets.

d. Water-Saving Kits

The District will periodically make available, without cost and for use in residences receiving water service from the District, a water-saving kit containing the following devices for use with non-water conserving fixtures:

- (1) a device or devices for reducing toilet flush water requirement;
- (2) a device or devices for reducing shower flow rate;
- (3) dye tablets for determining if a toilet tank leaks;
- (4) other devices from time to time approved by the District;
- (5) device installation and other instructions and information pertinent to conservation of water.

e. Water-Saving Devices and Restrictions for New Development

- (1) Water service will not be furnished to any Applicant for new or expanded service unless the water-saving devices hereinafter described are installed.

MAR 15 2000
ku

- (2) All interior plumbing in new buildings shall meet the following requirements:
 - (i) toilets and associated flush valves shall not use more than 1.6 gallons per flush,
 - (ii) urinals and associated flush valves shall not use more than 1.0 gallons per flush,
 - (iii) shower heads shall restrict flow to a maximum of 2.75 gallons per minute,
 - (iv) kitchen and lavatory faucets shall have aerators, laminar flow devices, flow control inserts, orifices or other devices that restrict flow to a maximum of approximately 2.5 gallons per minute.
- (3) Proposed new turf areas irrigated with water furnished by the District shall be limited in size as follows:

single family detached residences and duplexes, per dwelling unit (d.u.)	400 sq ft
townhouse/condominiums, triplexes and fourplexes, per d.u	200 sq ft
apartments (5 units or more) and mobile homes, per d.u.	50 sq ft
commercial, industrial and government projects	250 sq ft

- (4) If proposed new turf areas are served by an in-ground irrigation system it shall be capable of distributing water with a high degree of uniformity and be designed by a landscape architect or other competent person, and shall be operated by an electric time controller set for early morning irrigation. The controller shall support a minimum of three start times per irrigation day per valve (station) and shall permit programming each valve with individual run times. The designer shall include an Irrigation Schedule Guide on the irrigation system plan drawing(s) consisting of a table containing the following information for each valve which is designed to automatically control water to a set of sprinklers which irrigate turf:
 - (i) combined flow rate of sprinkler heads downstream of valve (in gallons per minute)
 - (ii) area of turf served by valve (in square feet)
 - (iii) precipitation rate (in inches per hour)

- (iv) recommended irrigation schedule for each month of the irrigation season (April - October) including recommended irrigation days per week, number of start times (cycles) per irrigation day, minutes of "on time" or run time per cycle, and estimated minutes of "off time" between cycles. This schedule shall be based upon the assumption that the turf has reached maturity. Users of the schedule shall be warned by a note adjacent to the schedule that more water may be required when the turf is new.
- (5) Prior to installing the proposed turf, the soil supporting same shall be thoroughly tilled and amended with at least four cubic yards of organic material (such as nitrolized redwood sawdust) per 1000 square feet and other soil amendments in a quantity and type approved by a competent expert.
- (6) The District will consider, and may approve, requests to substitute for any of the requirements in this subsection e., well-designed alternatives or innovations that will affect similar significant and continuing reductions of water use.

f. Water for Narrow Turf Strips Prohibited

- (1) An application for service to unimproved land for which a landscape plan is required by the county as a condition of land use approval shall be processed only if the turf modulus for each separate turf parcel proposed in the landscape plan is at least 7. The turf modulus for each separate turf parcel is defined as the quotient obtained by dividing the area of said turf parcel in square feet by its perimeter in feet. In defining the limits of an individual turf parcel, a path designed for pedestrian traffic which traverses a turf parcel shall be treated as though it were turf. A turf parcel shall be exempt from this requirement if its width at the narrowest point is at least 16 feet.
- (2) Applications for water service will be exempt from the provisions of this subsection f. if any of the following conditions exist:
 - (i) The total turf area is less than 400 square feet.
 - (ii) The total turf area is less than 20% of the total landscaped area (excluding hardscape such as patios and pavement) and the turf modulus for the combined turf parcels is greater than 7. The turf modulus for the combined turf parcels is defined as the sum of the areas of each turf parcel in square feet divided by the sum of the perimeters of each turf parcel in feet.
 - (iii) Recycled water or private water source is used to irrigate the landscape.
- (3) The Applicant shall submit a copy of the proposed landscape plan and a step-by-step analysis demonstrating whether said plan meets the requirements of this section or qualifies for an exemption as noted above. If the application does not qualify for an exemption, the analysis must include the following data:

MAY 15 2000
Kw

(i) For each individual turf parcel:

- (a) area including pedestrian paths which traverse the parcel (in square feet).
- (b) perimeter (in feet).
- (c) turf modulus (area divided by perimeter).

(ii) For entire project:

- (a) total area of proposed landscaping excluding patios, pavement, pools and pavement other than pedestrian paths which traverse a turf parcel.
- (b) total area of turf parcels.
- (c) the percentage of total turf area to total landscaped area ((b) divided by (a)).
- (d) the overall turf modulus which is the sum of the areas of all the turf parcels divided by the sum of all perimeters for all turf parcels.

g. Rebate for Removing Irrigated Turf from Residential Properties

(1) The owner of property containing a formal lawn area or areas shall be eligible for a cash rebate from the District if said owner removes all or part of the formal lawn area(s) and replaces same with eligible plant materials and meets the qualification requirements. "Formal lawn area" means an existing lawn which is irrigated regularly with water furnished by the District and mowed regularly.

(2) Qualification requirements:

- (i) Application for rebate must be made on District's form prior to removing the formal lawn area(s). All applicable information requested must be supplied.
- (ii) Application for rebate must include a landscape plan or sketch showing the size, in square feet, and location of all formal lawn area(s) on the Applicant's parcel and the location of formal lawn area(s) that will be removed and replaced.
- (iii) The Applicant must utilize only eligible replacement materials for the formal lawn area(s) removed which are to be considered in calculating the rebate. Eligible replacement materials are water conserving plants, vegetable garden(s), or other low water using plant material. Hardscape or structures such as patios, decks, gravel, decorative stones, concrete, asphalt, pools, building extensions, porches, et cetera, are not eligible replacement materials.

- (iv) If the formal lawn area(s) proposed for removal and replacement are served by an in-ground irrigation system and if the in-ground system will continue to serve some remaining formal lawn area(s), Applicant must modify the system so that water served to the proposed replacement area passes through a separate valve which can be independently controlled.
 - (v) Formal lawn area(s) removed and replanted with eligible replacement materials shall be mulched with a mulch suitably thick to prevent weed growth (generally four inches) is required. This requirement shall not apply to vegetable gardens.
 - (vi) The owner of the property must sign a statement promising not to reinstall lawn in formal lawn area(s) where lawn has been removed as long as the owner holds property. The owner may be relieved of this promise at any time by returning the full amount of the District's rebate.
 - (vii) The General Manager may at any time halt or suspend acceptance of applications for rebate if the District's funds appropriated for this purpose become exhausted.
- (3) After reviewing the information supplied by the Applicant and making at least one site inspection to assure that qualification conditions have been met, District shall mail a rebate check.
 - (4) The amount of the rebate shall be calculated by the District at the rate of \$35 per 100 square feet of formal lawn area(s) removed and replaced with eligible replacement plant materials but shall not exceed the values shown below:

	Type of dwelling unit (d.u.)	Water Conservation credit per d.u.
SF	single family detached residences and duplexes, each d.u.	\$200
THC	townhouses, condominiums, triplexes and fourplexes, each d.u.	150
APT	apartments (5 units or more), each d.u.	100
SC	senior citizen units or second units, each d.u. ..	80

Rebates are not available for non-residential property including hotels, motels, hospitals or a senior citizen complex on a parcel which is separately owned and assessed.

MAR 15 2000

h. Requirement for Installation of Water Conserving Plumbing Fixtures Upon Change of Property Ownership or Upon Bathroom Alteration

(1) Definitions.

- (i) "Water-Conserving Plumbing Fixtures" means any toilet using a maximum of 1.6 gallons of water per flush, urinals that use a maximum of 1.0 gallons of water per flush, showerheads with a maximum flow rate of 2.75 gallons of water per minute or faucets that can emit no more than 2.5 gallons of water per minute.
- (ii) "Change in Property Ownership" means a transfer of present interest of real property, or a transfer of the right to beneficial use thereof, the value of which is substantially equal to the proportion of ownership interest transferred. The person, persons or entity making such a transfer is the "Transferor."
- (iii) "Bathroom Alteration" means any alteration or addition of a bathroom that includes replacement or addition of any toilet(s).
- (iv) "Retrofit" means replacing "Existing Plumbing Fixtures" with "Water-Conserving Plumbing Fixtures."
- (v) "Existing Plumbing Fixtures" means any toilet using more than 1.6 gallons of water per flush, urinals using more than 1.0 gallons of water per flush, showerheads with a flow rate of more than 2.75 gallons of water per minute or faucets that emit more than 2.5 gallons of water per minute.
- (vi) "Existing Structure" means any structure built and available for use or occupancy on or before March 1, 1992, which is equipped with a toilet using more than 1.6 gallons of water per flush or a urinal using more than 1.0 gallons of water per flush.

(2) Retrofit Upon Change of Property Ownership.

All Existing Plumbing Fixtures in Existing Structures receiving water from the District's water system, including residential, commercial, industrial and government structures, shall, at the time of Change of Ownership, be Retrofitted, if not already done, exclusively with Water-Conserving Plumbing Fixtures. This requirement shall affect all escrow accounts involving transfer of property opened after February 29, 1992. Escrow accounts opened before March 1, 1992 which close after March 1, 1992 shall not be affected by this requirement.

(3) Retrofit Upon Bathroom Alteration.

Effective March 1, 1992, all structures receiving water from the District's water system, including residential, commercial, industrial and government, shall, upon Bathroom Alteration, be Retrofitted exclusively with Water-Conserving Plumbing Fixtures.

(4) Retrofit Exemptions.

The District's General Manager may grant an exemption in the following instances:

- (i) Unavailability of Water-Conserving Plumbing Fixtures to either match a well-defined historic architectural style fitted with authentic plumbing fixtures or accommodate existing house plumbing without Bathroom Alteration.
- (ii) Special health circumstances upon submittal of reasonable evidence that demonstrates that specific plumbing fixtures are required by the user that may not meet the Water Conserving Plumbing Fixture criteria defined by this regulation.
- (iii) Faucets at kitchen sinks or antique faucets which do not have low flow features.

(5) Compliance and Penalties.

Compliance shall be by the honor system. It shall be the Transferor's responsibility (in the case of Change of Property Ownership) and the title holder's responsibility (in the case of Bathroom Alteration) to obtain, in addition to any normal permits required by agencies other than the District, to apply for and obtain from the District a Certificate of Compliance acknowledging that the Transferor or title holder has stated that the Retrofit installation required by this regulation has been completed. If the District later determines or finds that the work was not done or was not completed or that Water Conserving Plumbing Fixtures are no longer present, the District may assess an annual fee of 20% of the estimated annual water bill as determined by the District until the owner of the property demonstrates that the required Retrofit work has in fact been done. A site inspection shall be required in such cases and the owner shall be charged \$35 for each such site inspection as an added fee on the owner's water bill.

(6) Alternative Compliance Procedure for Transfers of Residential Property

At Transferor's option, Transferor shall pay the District \$315 per bathroom that does not fully comply with Regulation 17 h. Half bathrooms shall count as one bathroom. The District shall thereupon immediately provide a Certificate of Compliance to Transferor. Buyer shall then be responsible for installation of the Water Conserving Plumbing Fixtures and Transferor shall provide Buyer with a copy of District Regulation 17 h. and shall notify Buyer of this requirement in

writing before close of escrow. Buyer shall have one year from the date of close of escrow to install such fixtures. Upon being notified that said fixtures have been installed and making a brief inspection confirming installation, the District shall pay the Buyer an amount equal to the payment made to District by Transferor. If after one year, the Water Conserving Plumbing Fixtures have not been installed, the District shall install same, provided the Buyer gives the District consent to do so. If said consent is not forthcoming, the District shall charge Buyer an annual fee of 20 percent of the estimated annual water bill as determined by the District until the Buyer of the property provides the District with consent to install the Water Conserving Plumbing Fixtures or allows District inspection which confirms the installation thereof. No payment shall be made to Buyer after one year has elapsed from close of escrow. In the event the District does install the Water Conserving Plumbing Fixtures, the District shall provide the following as applicable, for each \$315 amount paid by Transferor:

- (i) installation of a chrome plated showerhead with shut-off valve (if showerhead is present);
- (ii) installation of one chrome plated lavatory aerator (if existing lavatory faucet is fitted with threads for an aerator and if no aerator is present);
- (iii) installation of one 1.6 gallon flush white china toilet including white wooden seat, wax seal, and new angle stop and riser.

District shall not be responsible for replacement or modification of any floor, floor substructure or any floor covering material.

i. Rebate for Early Retirement of Non-Water Conserving Toilets in Residences

- (1) A non-water conserving toilet is defined as any toilet that requires more than three gallons per flush to operate.
- (2) Any qualifying residential customer of the District who removes a non-conserving toilet and replaces same with a toilet using 1.6 gallons per flush or less may request and receive a cash rebate of \$40 for each such toilet removed and replaced.
- (3) There shall be a limit of two such rebates per dwelling unit.
- (4) To qualify for a rebate(s) hereunder, application shall be made on a form available from the District and person signing application shall:
 - (i) be a customer of the District and the customer's dwelling in which the replaced toilet(s) is located shall be served water from the District's Point Reyes source of supply (Point Reyes and Paradise Ranch Estates areas); and
 - (ii) provide District with bill of sale or original receipt of sale dated April 1, 1992 or later and made out to said customer by person or vendor selling

customer the 1.6 gallon flush toilet or, in lieu thereof, provide District with letter addressed to said customer signed by a licensed plumber or contractor stating that a toilet(s) using not more than 1.6 gallons per flush has been installed by said plumber or contractor at the customer's address; and

- (iii) turn into District the toilet tank lid (undamaged if possible) from the old toilet.
- (5) Prior to mailing rebate, District may opt to make a brief inspection of customer's dwelling at a time and date approved in advance by customer. Should customer refuse access for an inspection, District shall not be under any obligation to make a rebate.
- (6) If the residential customer is renting the dwelling, a rebate will be made provided customer includes with the application a letter from the owner of the property consenting to District making rebate payment to customer for the replacement of a non-water conserving toilet(s).
- (7) Rebates are not available for toilets installed in:
 - (i) buildings constructed after January 1, 1992;
 - (ii) commercial or government buildings; and
 - (iii) residential property owned by commercial or governmental entities.
 - (iv) residential property covered under provisions of Regulation 17 h.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

(916) 657-1359

NOTICE OF PETITION FOR TEMPORARY URGENCY CHANGE,
TO ADD POINTS OF DIVERSION TO DEFER SUMMER DAM INSTALLATION,
UNDER APPLICATION 13965 (LICENSE 4324)

Notice is hereby given that on April 20, 1993

Waldo Giacomini
P.O. Box 126
Point Reyes Station, CA 94956

filed a Petition for Temporary Urgency Change, under Section 1435 et seq. of the California Water Code, with the State Water Resources Control Board (State Water Board). The petitioned change would temporarily add two points of diversion to License 4324 during the May 1, 1993 through October 27, 1993 period.

The additional points of diversion are upstream of Giacomini's authorized point of diversion on Lagunitas Creek, and are wells controlled by the North Marin Water District (District). The wells are located behind the U.S. Coast Guard Housing Facility and at the "Old Downey" site. The District owns the Downey site, but does not use the well for community water supply because it draws water from Lagunitas Creek and is vulnerable to contamination.

The proposed change would defer the need to install a summer-time salinity barrier dam in Lagunitas Creek, which protects Giacomini's irrigation supply from salinity intrusion. The water is used for pasture irrigation. The temporary change would allow the unimpeded out-migration of any late-running salmonid smolts.

WATER RIGHTS TO BE TEMPORARILY CHANGED:

The authorized point of diversion under the license is located on Lagunitas Creek tributary to Tomales Bay, in Marin County: within the SW $\frac{1}{4}$ of NW $\frac{1}{4}$ of projected Section 36, T3N, R9W, MDB&M: California Coordinate System, Zone 3, N 578,000, E 1,335,200. The water right allows the diversion of up to 2.67 cubic feet per second, from May 1 to November 1, to irrigate up to 175 acres of land, described as follows: 115 acres, within projected Section 35, T3N, R9W, MDB&M; and 60 acres, within projected Section 36, T3N, R9W, MDB&M.

The proposed temporary urgency change would add points of diversion from Lagunitas Creek tributary to Tomales Bay, in Marin County; and are described as follows:

1. The "Coast Guard Well," located within the SW $\frac{1}{4}$ of SE $\frac{1}{4}$ of Section 25, T3N, R9W, MDB&M (pursuant to Statement of Water Diversion and Use No. 8763); and
2. The "Downey Well," located within the SE $\frac{1}{4}$ of NE $\frac{1}{4}$ of Section 25, T3N, R8W, MDB&M.

PURPOSE AND DETAILS OF THE TEMPORARY CHANGE:

This project is an experiment that involves temporary above-ground installation of approximately 1 mile of 8-inch pipe connecting the existing Giacomini Ranch irrigation system headworks to the District's existing upstream wells. The project would provide a temporary alternative means of delivering irrigation water to the existing Giacomini Ranch irrigation system so that installation of the annual Giacomini summer dam can be deferred until late spring to enable potentially late-running out-migrating salmonid smolts to pass downstream to Tomales Bay unimpeded by the dam. Beach seining (fine mesh nets) would be conducted to determine if, and to what extent, the smolt out-migration continues past mid-May, the time the summer dam is normally installed each year.

STATUTORY PROVISIONS WHICH APPLY TO TEMPORARY URGENCY CHANGES:

The State Water Board is authorized to issue temporary urgency change orders under Sections 1435 through 1442 of the California Water Code. To approve the petitioned change, the State Water Board, must find the following:

1. The petitioner has an urgent need to make the proposed change;
2. The proposed change may be made without injury to any other lawful user of water;
3. The proposed change may be made without unreasonable effect upon fish, wildlife, or other instream beneficial uses; and
4. The proposed change is in the public interest.

Any such order shall be subject to prior rights and shall not result in the creation of a vested right, even of a temporary nature, but shall be subject at all times to modification or revocation at the discretion of the State Water Board.

COMPLIANCE WITH CALIFORNIA ENVIRONMENTAL QUALITY ACT

After consultation with responsible agencies, the District, the lead agency pursuant to the California Environmental Quality Act (CEQA, Public Resources Code Section 21000 et seq.), has determined that the proposed project will not have a significant effect on the environment and an Environmental Impact Report will not be required. The Initial Study and Determination to Prepare a Negative Declaration, and a detailed plan view of the proposed project are available by calling the District at (415) 897-4133. If you have information not covered in the District's environmental document which indicates that the project will have a significant effect on the environment, please send this information immediately to Mr. Michael Falkenstein, MF:13965, P.O. Box 2000, Sacramento, CA 95812-2000; or at the FAX number listed below. Such information will be reviewed in accordance with CEQA.

NOTE: The District has scheduled a public hearing on May 4, 1993 at 8:30 p.m. at 999 Rush Creek Place, Novato, California on its proposed Negative Declaration for the project.

RELATIVE TO OBJECTIONS:

Objection(s) to approval of the proposed temporary urgency change must be filed by 4:00 p.m. on May 5, 1993 with a brief statement of fact(s) supporting the objection(s). Fax copies may be sent to (916) 657-1485, but the original must also be submitted to the State Water Board.

Objection(s) to the proposed change(s) must be based on the following: an allegation that there is no urgency, that the proposed change(s) would injure vested right(s), is not in the public interest, would have an adverse environmental impact, would be contrary to law, or is not within the State Water Board's jurisdiction. The objection(s) must be sent to the following parties:
